

Good Morning,

I am writing on behalf of East Lyme Pediatrics. We are a 3 physicians office that currently employs 4 Medical assistants.

We traditional use MA's with each of our physicians. We have found they have a greater all around medical knowledge then LPN's. We have been forced to hire an LPN due to **Connecticut** not allowing MA's to administer immunizations. Our office would benefit with allowing the MA's to administer vaccines, it would allow the office visit to run that much smoother without having to wait for an LPN.

We strongly wish for this bill to be passed.

Thank you,

Joy Morton, CMA
Office Manager
